Report
OF THE
One Hundred and Fifty-Second Annual Meeting
OF THE
CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL

PENNSYLVANIA HOSPITAL, 5th mo. 4th, 1903.

At the one hundred and fifty-second Annual Meeting of the Contributors to the Pennsylvania Hospital the day and year aforesaid, Joseph G. Rosengarten was called to the Chair, and John T. Lewis, Jr., was appointed Secretary.

The minutes of the last meeting were read and approved.

The Annual Report of the Board of Managers was read by James T. Shinn, which was accepted and referred to the incoming Board to print such matter as they may deem expedient.

The Annual Report of the Department for the Insane was read by Benjamin H. Shoemaker, which was accepted and referred to the incoming Board to print as much of it as they may think proper.

On motion, the meeting adjourned.

JOSEPH G. ROSENGARTEN, *Chairman*.

JOHN T. LEWIS, JR., *Secretary*.

Pennsylvania Hospital.

At the 152nd Annual Meeting of the Corporation, held 5th month 4th, 1903, the following contributors were elected to serve for the ensuing year :

MANAGERS.

BENJAMIN H. SHOEMAKER,	JOHN T. LEWIS, JR.,
T. WISTAR BROWN,	JOHN S. JENKS,
CHARLES HARTSHORNE,	JOSEPH E. GILLINGHAM,
JAMES T. SHINN,	ARCHIBALD R. MONTGOMERY,
JOHN B. GARRETT,	HENRY H. COLLINS,
JOHN W. BIDDLE,	JOSEPH B. TOWNSEND, JR.

TREASURER.

HENRY HAINES, 514 Walnut Street.

At the first meeting of the managers the Board unanimously elected

BENJAMIN H. SHOEMAKER, *President.*

JAMES T. SHINN, *Secretary.*

STANDING COMMITTEES.

LOANS	{ T. WISTAR BROWN, CHARLES HARTSHORNE, JOSEPH E. GILLINGHAM.
APOTHECARY SHOP	{ JAMES T. SHINN, JOHN W. BIDDLE, HENRY H. COLLINS.
LEGACIES AND TRUSTS	{ CHARLES HARTSHORNE, JOHN B. GARRETT, JOHN T. LEWIS, JR.

Clerk and Librarian, MILTON M. BERGEY.

Apothecary, FREDERICK I. KAISER.

Assistant Matron, MARTHA G. BYERLY.

Assistant Superintendent of Nurses, ALICE M. GARRETT.

Report of the Board of Managers

TO THE

CONTRIBUTORS

AT THEIR

152nd Annual Meeting, held Fifth month 4th, 1903.

During the past winter the wards of the Hospital contained the greatest number of patients at any one time in its history. On February 9th, 1903, three hundred and forty-four cases occupied beds in the wards, and of this number one hundred and twenty were suffering from typhoid fever. The Children's Ward was utilized for men medical patients on the 1st of February, and since that time there has been a daily average of three hundred and thirty-three in the House. For several months very few medical cases except typhoid fever and pneumonia could be admitted, and with all the increased facilities many had to be declined; as many as one thousand, both medical and surgical, being refused for want of room during the winter.

YEARLY STATEMENT FOR THE PINE STREET HOSPITAL.

New patients received in the wards	.	.	.	4,430
Patients remaining, May, 1902	.	.	.	265
Total number treated in wards	.	.	.	4,695
Patients remaining, May, 1903	.	.	.	301

RECEIVING WARD.

Number of cases admitted	23,452
Of these 4,430 were transferred to the wards.					

OUT-PATIENT DEPARTMENT OR DISPENSARY.

Number of new cases treated: Surgical, 10,157; Medical, 2,345; Eye and Ear, 2,521; Nose and Throat, 1,081; Gynaecological, 412; Mental and Nervous, 33; Dermatological, 506. Total 17,055.

Total number of cases treated in the wards, Receiving Wards and Out-Patient Department of the Pine Street Hospital, **40,772**.

The Hospital Ambulances have been in service 1,599 times; and the Police Patrols have made 1,900 trips to the Hospital, bringing, mainly, recent accident cases; the patrol officers treating them with the utmost care.

The large number of patients, high cost of provisions and the increase in the price of coal—which alone adds more than five thousand dollars to our expenditures over last year—have made our expenses amount to \$135,184.97, which is \$37,155.00 beyond the income from invested funds, and we would again call the attention of the friends of the Hospital to the importance of adding to its permanent endowment. Were it not for legacies and generous contributions received every year, the great charity of relieving the sick and suffering would be seriously curtailed.

BEQUESTS AND CONTRIBUTIONS

Received during the year 1902-3.

BEQUESTS.

From Estates of	
Charles E. Moffatt, for free bed in name of	
Thomas Moffatt	\$8,454 49
Israel Fleishman	1,423 73
Thomas Elkinton, for Orthopaedic cases .	4,762 50
M. D. Evans	449 00
Emily Phillips	4,083 33
“ for Insane Department . .	2,041 67
Harriet L. Benson	5,000 00
Mary E. Jackson, on account	2,500 00

Jane Gordon	\$5,000 00
Sarah A. Whittaker	36 00
Margaret E. Lewis	4,507 21
George W. Farr	10,120 00
George S. Pepper	2,750 00
L. Taylor Dickson, cash	35,801 76
“ Securities, appraised at	53,954 66

CONTRIBUTIONS.

From	
Joseph G. Rosengarten	50 00
Joseph E. Gillingham, on account of Memorial Building	6,092 35
Ada Townsend	2,500 00
Mrs. William Rupp	20 00
Albert Lucus	10 00
Fredrick F. Ayer for “Laboratory Bulletin”	15,000 00
R. Francis Wood	10 00
Henry H. Collins	300 00
Philadelphia Rapid Transit Co.	100 00
Dr. Thomas F. Branson	30 00
Henry S. Williams	30 00
Sarah P. Morris	100 00
Emerson Wetherall	15 00
Morris, Wheeler & Co.	100 00
Columbus W. Gabell, Jr.	30 00
Mary C. Hart	50 00
Dr. Charles D. Hart	50 00
Mary H. Hart	25 00
John Story Jenks, for Cold Storage, Elevator, etc.	12,381 93

Work in the “Ayer Clinical Laboratory” has been conducted with great advantage to the patients and help to the Medical Staff, under the supervision of Dr. Simon Flexner. By the further generous gift of \$15,000, from Fredrick F. Ayer, provision has been made for the publication of its proceedings in the “Laboratory Bulletin.”

IMPROVEMENTS.

A new curb and granolithic pavement has been laid around the property at the southeast corner of Spruce and Eighth streets, used as an annex to the Nurses' Home.

Iron railings on the bridges connecting the centre and east and west pavilions of the Hospital on Spruce street, have replaced the wooden ones which were constantly needing repairs.

The old kitchen has been converted into a room for the reception of supplies and connected with the driveway by a hydraulic lift. The cold storage rooms begun last year have been completed, adding greatly to economic administration. The cost of this amounting to \$12,381.93, has been defrayed by a fellow Manager.

Two new ambulances, of lighter construction than the old ones, have been provided and found to be an improvement.

CHANGES IN THE MEDICAL STAFF.

The Hospital has met with a most severe loss in the death of Dr. Fredrick A. Packard, which occurred November 1st, 1902. The following minutes were adopted by the Board and Staff:

“ Dr. Packard served as Resident Physician 1886-87, and was appointed physician to the Out-Patient Department, 5th month 30th, 1893. He was elected a member of the Visiting Staff, 11th month 2nd, 1899, and has served this Hospital to our entire satisfaction. The Board desires to record its appreciation of his faithful and skillful services; to bear testimony to the high order of his professional attainments, to his conscientious devotion to his duties and to the great value of his judgment and experience in his practice in the wards of the Hospital. As a warm friend and faithful officer, we keenly feel our share of the great loss from his early death in the prime of a successful career.”

Out of respect to his memory the election of a successor was deferred.

At the meeting of the Hospital Staff, held on the afternoon of November 3rd, the following expression of sympathy was approved, and it was moved that copies of it should be sent to the Board of Managers and to Mrs. Packard :

“The Staff of the Pennsylvania Hospital desires to express their sorrow and grief at the death of their associate, Dr. Fredrick A. Packard. They feel that not only the Hospital but the medical profession and the community at large have suffered a grievous loss. They regard with pride his high standing as a physician, his activity as an author and teacher of medicine, and his usefulness as a citizen; and will always cherish the memory of his lovable personality as shown in the noblest qualities of honor, truth, integrity, sincerity and unselfishness.”

Dr. James Tyson was elected successor to Dr. Packard.

The office of Anaesthetizer was created, and Dr. Francis Olcott Allen, Jr., elected to the position.

A Dermatological clinic was created in the Out-Patient Department, and Dr. Charles N. Davis was elected to conduct it.

NURSING.

Under the efficient management of our Superintendent of Nurses, Lucy Walker and two Assistants, there are one Night Superintendent, six Head Nurses, fifty-two Pupil Nurses and nine Probationers on duty in the Hospital.

Four Nurses from the Alleghany General Hospital, came on February 8th, to serve three months.

In addition to the practice at the bedside and the regular course of lectures, the Senior Class also heard from Miss S. H. Fullom a talk on private nursing; Dr. Joseph M. Spellissy, history of Nursing; Dr. Francis R.

Packard, care of the Ear, etc.; Dr. P. N. H. Schwenk, care of the Eye; Dr. Charles N. Davis, care of the Skin, and Dr. A. R. Moulton, nursing of Nervous Diseases.

On account of the unusual amount of sickness special nurses were employed; graduates for 1128 days and pupil nurses 574 days and 186 nights, making a total of 1,888. Of these 1,063 days were paid for by patients occupying private rooms.

The Commencement Exercises were held at the Hospital on March 12th of this year. Dr. J. Allison Scott and John B. Garrett addressed the class. Seventeen nurses received their diplomas. Four had already left the school, their term of service being completed. The remainder will leave during the summer.

The names of those who graduated are:

Anna M. W. Pennypacker,	S. Racey Biggar,
E. Frances Greene,	Phoebe Doyle,
Elizabeth Henry,	Ethel Lucas,
Jennie Maxwell,	Kate Richardson,
Alice R. Thorpe,	Alice A. Chambers,
Emily A. Holmes,	Amy Allison,
Elda M. Fair,	Myrtle Snyder,
Maud J. Strobel,	Anna M. Boltz,
Pearl Ellinwood.	

The Graduating Class presented a Morris chair for the nurses' sickroom; and the Misses Blanchard again gave \$50.00 for Christmas.

THE FARM.

The farms at Newtown Square have supplied the Hospitals in West Philadelphia and Eighth and Pine streets with 302,653 quarts of pure milk, besides quantities of potatoes and hay.

The house, on one of the farms, has been opened during the summer for the reception both of men and women patients, at different times, from the Department

for the Insane, and many have been benefited by the change.

The Managers regret to record the death of William Rhoads, this year, who occupied one of the farm houses as superintendent and caretaker of the Rhoads' Farms.

It is proposed to fit up the mansion for use of more patients, and so increase the facilities for relieving those suffering from Mental Diseases. It is also intended to erect a new barn, and a dwelling for a foreman to superintend the hands on the Rhoads' farms.

DEPARTMENT FOR THE INSANE,

Located in West Philadelphia.

Dr. John B. Chapin, Superintendent and Physician-in-Chief of this Department, reports the following statistics:

Number in Hospital, 4th month 24th, 1902,	451
Admitted during the year	200
Total number treated	651
Discharged	187
Remaining, 4th month 23rd, 1903	464

The cost of this Department has been:

Hospital for men	96,705.38
“ “ women	135,851.85

Making a total of \$332,557.23, of which the sum of \$59,920.40 has been expended for free patients, or those paying only part of the cost of their support.

Tablets, commemorating those who have made donations for this Department, have been placed in the halls of the Departments for men and women.

An electric light plant is being installed to take the place of gas, which is now used.

For full information as to the work of this Department we refer to the annexed report of Dr. John B. Chapin.

The ladies who have so long ministered at the bedside of the patients, and the devoted men who have conducted religious services in the Hospital for years past, still continue to give spiritual aid and comfort to the afflicted ones.

The Managers testify to the efficient service rendered by all the officers connected with the Pennsylvania Hospital and their unwearied devotion to the relief of the sick and suffering people placed under their charge.

BENJAMIN H. SHOEMAKER,
President.

JAMES T. SHINN.

Mrs. Esther W. Strawbridge, children's play-house and
furniture.
Williams, Browne & Earle, magazines and papers,
numerous times.

Statistics

SHOWING THE NUMBER OF PATIENTS TREATED, THE COST
OF MAINTENANCE, ETC., FOR THE YEAR ENDING
FOURTH MONTH 25TH, 1903.

Number of patients remaining in the Hospital Fourth Month 26th, 1902—pay, 10; free, 255; total	265
Patients admitted during the year—pay, 144; free, 4,286; total	4,430
Total number treated in the Wards during the year	4,695
Number of patients treated in the Receiving Wards, and not remaining in the House . .	19,022
Number of out-patients treated during the year	17,055
Total number of patients treated	40,772
Number of patients remaining in Hospital Fourth month 25th, 1903—pay, 11; free, 290; total	301
Average daily number of patients maintained in the Wards—pay—7.62; free, 257.06; total	264.68
Average stay of each patient, days	20.54
Cost for maintenance of in- patients	\$123,184 97
Approximate cost of out- patient service	12,000 00
Total expense for the year	\$135,184 97
Average cost per day for each in-patient .	1 27 +
Average expense to the Hospital for each out-patient	33

Of the patients discharged		
The number cured was		3,060
“ “ relieved		732
“ “ removed without material improvement.		135
“ “ died		467
		<hr/>
		4,394

Of the 467 deaths, 130 died within twenty-four hours after admission.

Since the foundation of the Hospital, in 1751, there have been admitted to beds in the wards 160,460 patients, of whom 116,037 were poor persons, supported at the expense of the institution.

Of these 160,460 patients there have been :

Cured	108,342
Relieved or improved	26,779
Left the Hospital without material im- provement	9,418
Died	15,620
Remaining	301
	<hr/>
	160,460

Since the re-organization of the Out-Patient Department in 1872 there have been treated 251,490 out-patients, making 933,006 visits.

DEPARTMENT FOR WOMEN

REPORT

OF THE

Physician-in-Chief and Superintendent of the
Department for the Insane of the
Pennsylvania Hospital.

TO THE MANAGERS OF THE PENNSYLVANIA HOSPITAL:

The following report of the Department for the Insane for the year ending Fourth Month 23d, 1903, is herewith presented:

	MEN.	WOMEN.	TOTAL.
The number of patients in the Hospital			
Fourth month 24th, 1902	190	261	451
*Admitted during the year	99	101	200
Whole number treated	289	362	651
Discharged	82	105	187
Remaining Fourth month 23d, 1903 . . .	207	257	464
Daily average during the year	193	260	453

RESULTS OF THE YEAR.

	MEN.	WOMEN.	TOTAL.
Recovered	22	36	58
Much improved	10	19	29
Improved	12	18	30
Stationary	12	9	21
Died	15	20	35

RESULTS SINCE THE OPENING OF THE NEW HOSPITAL IN 1841.

	MEN.	WOMEN.	TOTAL.
Recovered	2423	2480	4903
Improved	1491	1594	3085
Stationary	1105	607	1712
Died	1024	781	1805
Total	6043	5462	11,332

*Of the number admitted during the year, fourteen were cases of alcohol and opium habit; they do not appear in the Table of Results.

The whole number admitted into the Pennsylvania Hospital prior to the opening of the Department in West Philadelphia in 1841 .	4,360
Admitted into the Department in West Philadelphia since its opening in 1841	11,505
Total	<u>15,865</u>

Of the patients discharged "recovered," eight were residents of the Hospital less than one month; fourteen between one and three months; fourteen between three and six months; nineteen between six months and one year; and three for more than a year.

Of those discharged "much improved," six were under treatment less than three months; eight between three and six months; eight between six months and one year; and seven for more than a year.

Of those who "died," five were in the house less than a month; three less than three months; four between three and six months; one between six months and a year; seventeen for a period longer than a year; two had been residents of the Hospital continuously for twenty-eight years; two over thirty-five years; and one for forty-five years.

Compared with former years, the statistics of the Hospital show a moderate increase of admissions, a greater daily average, a larger percentage of recoveries, and a greater number under care.

The admissions comprise the various forms of acute and chronic mental disease, together with a considerable number of those afflicted with a failure of the faculties incident to old age. Applications for the admission of the latter class are more frequently made than formerly, and from the nature of our social conditions may be expected to increase. To grow old, to drift into a helpless and hopeless state from mental infirmities, to be poor and homeless, are conditions sad to contemplate. While applications for the admission of aged persons suffering from senile dementia have appealed to the sympathies

DEPARTMENT FOR WOMEN—THE VILLA

of the Managers, as they would to whomsoever their claims might be presented, they have felt bound to exercise a wise discretion in arriving at a just decision, considering the limitation of their means and the Hospital accommodation. On the one hand it should not be made too easy to shift from relatives the duty of caring for the aged, even if, with added years, the mental faculties have become feeble and clouded. On the other hand the Managers, holding it to be their first duty to give preference to applications for admission to their Hospital to recent and curable cases, and those presenting a prospect of improvement, have, in exceptional cases, considered favorably requests for the reception of patients suffering from senile dementia, as they have received other incurables who were absolutely helpless, without relatives or friends who could or would render adequate supervision and care.

Of the whole number admitted, thirty-eight per cent. were considered recoverable, or presented the strongest probability of decided improvement under treatment, and the rest were regarded incurable at the time of admission.

Fifty-two per cent. of the patients admitted were received from the City of Philadelphia, while the remainder, or nearly one-half, came to the Hospital from other portions of the State, or beyond.

Excluding alcoholics and other habit cases, who do not figure in the results, the percentage of recoveries, calculated on all admissions, was thirty-one. The number of patients received during the past ten years was one thousand six hundred and fifty-three, of whom twenty-nine per cent., plus, recovered. A number of patients who were discharged as "much improved" undoubtedly eventually made a good recovery.

The average number of weeks the patients discharged as "recovered" were under treatment in the Hospital was eighteen.

As a result of observation during the present year,

as well as in former years, it can be stated that a *larger* proportion of patients of very moderate means make a good recovery under hospital treatment than do those possessed of ample resources. The class with moderate means, or no resources, on the occurrence of a mental attack, have no other recourse in their trouble but a hospital. The other class, unfortunately, too often look upon the hospital only as a last resort, or, for various reasons, wise or unwise, a prompt admission is postponed.

The report of the Steward, which appears in the appendix, shows that receipts for board and care of patients was \$221,166.96.

The number of weeks that patients occupied free beds was 1570.

The Memorial Building, "Dedicated to Medical and Hygienic Treatment in the Department for Women," the gift of a friend and benefactor of the Hospital, which was announced as completed in the last annual report, has been in continuous use for medical and other purposes during the year. It has brought a measure of health, refreshment and enjoyment to all who have received the various baths, and promises to become an addition to our medical resources of very great value.

During the year a patient was taken to court, in obedience to a writ of *habeas corpus*. After a hearing, the judge of the court decided that the relator be returned to the care of the Hospital. This incident—an orderly proceeding of little significance in itself—discloses the fact that an insane person does not lose any legal right by reason of detention in a hospital. It shows a willingness and sense of duty to investigate the nature of any proper statement affecting the individual rights of a person alleged to be unlawfully deprived of liberty. The writ of *habeas corpus* was originally intended to prevent illegal imprisonments on frivolous charges, and detentions without process of law. The application of the writ of *habeas corpus* to lunacy cases was not, of course, then contemplated, as hospitals for the insane did not exist. The

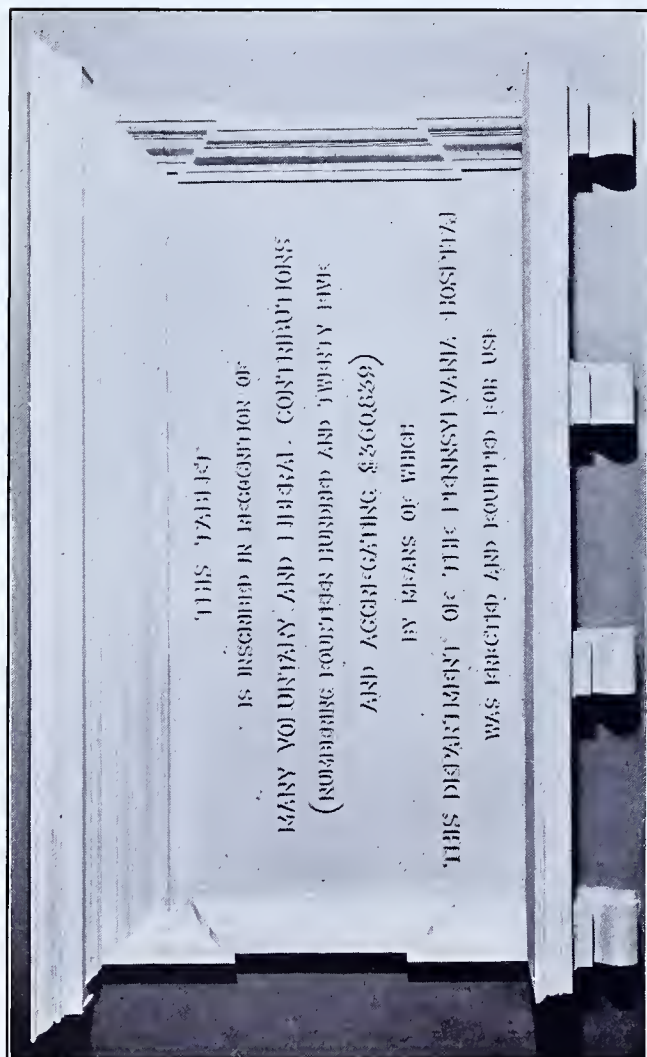

THE GILLINGHAM MEMORIAL BUILDING
1902

application of this proceeding has come to have a wider scope. What constitutes a legal detention in a hospital, and a due process of law to commit an insane person, has been a question that has exercised the minds of the judges and others. In this State, at an earlier day, it was assumed that it was necessary to show that a lunatic was unsafe to himself and a person dangerous to be at large, in order to warrant continued detention. In the '70's a number of discharges from this Hospital were ordered in accordance with those views. The Supreme Court of Pennsylvania, in 1875, expounded the law of this State in the case of Brickway, Pennsylvania Reports, when they said: "It is very evident from the record that this proceeding was under the sixth section of the Act of 20th April, 1869—a law passed to regulate the practice in the commitment of insane persons to hospitals of the State. The Act materially modifies former laws on this subject. It is not confined to persons found guilty of offences, or those dangerous to themselves, or to the community, or unsafe to be at large, but it extends to those *whose welfare or that of others requires them to be restrained, or who manifestly stand in need of proper care and treatment.*" These views are more clearly emphasized in the lunacy law of 1883, which has been in operation nearly twenty years. It may be a subject of interest to state our own experience of the operation of portions of the law, during this period, relating to the detention of persons certified to be insane. Since 1884, thirteen patients have been taken from this Hospital into the courts of this city on writs of *habeas corpus*. With one exception, all were returned to the Hospital. The judges were governed mainly by the principles announced above, but they enunciated their views in their own way. In every case the admission papers were found to be in strict conformity to the statutes. In the case of the exception noted, the physician expressed the opinion that the patient had recovered, but for good reasons desired the presiding judge to assume the *responsibility of a discharge*.

Many, if not all, of the petitions for the issue of this most gracious writ are believed to have been suggested by a perusal of the printed "Rules and Regulations," containing sections in reference to correspondence, which are required to be posted on the walls of all the hospitals of the State. It should be a subject of satisfaction to all interested, that in no single instance in all of the hearings was it shown that the patient had been improperly admitted or detained. Every one whose case has come under judicial examination was regarded as a proper subject for hospital care. This experience would doubtless be confirmed by hospital physicians in other portions of our State and country in respect to their institutions. In a long experience with applications for admission to a hospital, the first case of a conspiracy to place a person in an institution of this kind, for any improper purpose, has yet to come to my knowledge. The results of judicial examinations conducted by a number of the judges of our courts should be accepted, and dispel the groundless apprehensions and suspicions, if any such exist at this day. In the several proceedings the Hospital has not appeared in the sense of being a prosecuting party, but has been governed by the advice of its solicitor, Mr. Rodman Paul and his predecessors, George W. Biddle, A. Sidney Biddle, and Arthur Biddle, assisted by Mr. Wilkinson, in making a proper return, presenting the relator in person, and receiving the judgment of the court.

To commemorate in a becoming manner the various gifts that have been made to this department of your Hospital work, in order that the benefactions and their purposes might be held in perpetual remembrance, and not pass from the memory of those who may follow, it has been deemed an appropriate thing to do to place upon the walls of the two departments in West Philadelphia tablets which will record the names of donors and the special objects of their benevolences. By means of voluntary contributions the operations of the Hospital have been greatly enlarged and sustained. Without this char-

Department for Men

ity, the benevolent plans of the Contributors would have been much restricted. These tablets of marble are intended to be a lasting and grateful recognition of the benevolent purposes of those whose names appear upon them—there to remain forever. As object lessons, they turn our thoughts with gratitude to those whose sympathies were touched, by a knowledge of human distress, to do the great work that has been done in the past—so do we trust, with all confidence, that in the years to come the means to enlarge your operations may be greatly multiplied.

Contributions were made by fourteen hundred and twenty-five persons, amounting to \$360,839, to erect and furnish the Department for Men, which was completed in 1859. Their names appear in the annual report of that year. A tablet has been placed in this department to record these generous benefactions, a photographic copy of which appears in this report.

A tablet has been placed on the walls of the Department for Women that records the names and purposes for which munificent gifts were made.

A tablet has also been placed on the walls of the Department for Women, on which are inscribed the names of those who have generously founded free beds.

An additional tablet in the Department for Men commemorates a free bed, in the name of Frank H. Clark, which was endowed by his sisters and brothers, Clarence H. Clark, E. W. Clark, Helen C. Denniston, J. Hinckley Clark, Frances Clark, Sarah C. Zantzing, Mary C. Burnham.

A number of statistical tables that were prepared quite uniformly for a period of sixty years have now been omitted for two years. They included certain data relating to more than eleven thousand patients, and now furnish sufficient material that might be desired in any inquiry in which the facts would have a bearing. Mental disease in many instances comes so unexpectedly, and is looked upon as such a mysterious infliction by the

general public, that the physician is expected to determine the cause. A table of supposed causes of insanity is, however, of such little value from a clinical point that it has been omitted. Tables of assigned causes convey such an erroneous impression that it is not possible to reach a conclusion with any approach to exactness in every case. While it is a truism that a cause of insanity may be definitely determined in exceptional instances, yet in the majority of cases it is largely a subject of conjecture. A final judgment might, in some cases, be approximately reached only by an attempt to estimate the probable influence of various and many elements, as heredity, pre-natal conditions, education, environment, mental, moral and physical degeneration. Prominent delusions, occurrences, or adventitious incidents have but little or no significance in determining a cause, although often they are assigned too prominent a place. The presentation of the numerous factors to be taken into the account is but to announce the difficulties that must be surmounted in the problem.

If the nature of all the causes of mental disease is not yet ascertained, that which is of equal or greater importance is the fact that an advance has been made in recent years sufficient to guide a physician in a rational course of treatment to recovery. It can be cited that the relation of neurasthenic conditions and the recognition of toxic agencies in the production of insanity are better understood, and that the disease is more successfully treated. To trace a disease to a definite cause in clinical study, so that health may be restored by the application of a course of treatment, or to shorten the duration of disease, is in medical practice to be counted as an advance. It is in this promising line of inquiry that practical results of great benefit to mankind are yet to be accomplished. In this age of keen scientific investigation we shall indulge the hope that there may be those endowed with scientific spirit, prepared by study and training, sustained by a gift of persistence, who will

come forward to consecrate themselves to work this fruitful field. Already there are centres of investigation and study from which will yet come the reward of invaluable results. To systematically prosecute this work, dependence must ultimately be made upon private endowments. It can hardly be expected that hospitals that struggle to procure appropriations to meet their actual necessities, or that money given in the name of charity will be applied to other objects than those specifically indicated. If public appropriations were made for this object, there would be a constant risk that the original purpose would fail and it would come to an end.

The hospitals, while they will still continue to be the principal seats of clinical experience, must still perform the work for which they were originally created. Some hospital must receive every form of mental disease and infirmity, if it is to meet the needs of a community, otherwise the system will fall far short of what is expected of it. If a rigid rule to receive only the curable cases into a hospital were actually applied, if it were even possible to apply such a test of admission with any accuracy, two-thirds of the beds at least would remain vacant. Earlier plans of hospitals contemplated some provision for the classification of all forms of mental disease where all patients were congregated. The modern tendency is rather toward the segregation than the congregation of patients in one building. Segregation in this connection means special provision for classes and individualism in treatment. In the adoption of any such principles, it would not follow that hospitals now in general use must be abandoned or materially modified. The present hospitals represented the best thought of the day when they were constructed, and are still able to perform a great work. Yet out of the experience of the past there has come an evolution toward what are believed to be improved methods. The trend in recent years has been to continue to do what has been done by the hospitals in the past, and in addition, to supplement the plans with

facilities to do a better quality and more satisfactory work.

Of the hospitals of the future it may be expected that they will have special plans for the classification of acute cases at a period furnishing greatest hope of recovery, and wards for isolation of patients who cause disturbance and are refractory. The plans may comprise the addition of a block, or a group of blocks, for the reception of patients whose friends, for any reason, desire liberal and private accommodations, separate and apart from the main hospital. The building upon the grounds of your Hospital, known as the "Villa," is an example, in a moderate way, of what may be done in this direction.

As in every hospital a certain number of patients are noisy, disorderly and at times turbulent, requiring wards to be assigned for their care, so at all times a certain number are approaching and actually reach a stage of convalescence. Their premature removal is often disastrous, yet they come to have a normal appreciation of their situation. They are liable to annoyances from their associations, and some vague recollection of delusions and hallucinations, like the vagaries of a dream-state remain. In a hospital caring for the number and class that are under our care, fifteen to twenty of both sexes at any one time have usually reached a stage of convalescence. It would be a valuable addition to a hospital plant to have a house or houses for convalescents, where there would be an approach to family life, and which would be an intermediary testing-house between the hospital and home.

A laboratory is now held to be an essential part of a great hospital plant. The physician also in general practice even must have the assistance that a qualified bacteriologist alone can furnish. A room with a modest laboratory, yet sufficient to make examinations of the blood, the excreta, sputum, etc., in order to determine a correct diagnosis, should be a conspicuous part of the equipment of a hospital for the insane.

PENNSYLVANIA HOSPITAL FOR INSANE
Department for Women

In the hospitals of the present day, some of the principles that have been named have already been incorporated in the plans and in the administration. In the future the force of all will be recognized and applied in some way. There will also be new plans and principles evolved which are not yet disclosed.

The Out-patient Department has been visited twice weekly in turn by Drs. Moulton, Nunemaker, Josselyn and Phillips. During the hospital year, thirty-two new patients were treated, and sixty-five revisits were made. Other persons who desired information about lunacy matters and modes of procedure called at the department.

The Delaware County farm-house at Newtown Square was opened June 15th, 1902, and closed September 15th, following. During the season eighty-seven patients spent one or more weeks in this country house, about twelve miles from the city. In addition, ninety patients had a long drive through the country to the house, returning after a dinner. As we have reported in former years, the whole result has been decidedly good.

Instruction has been given to two classes of attendants by the physicians, Drs. Nunemaker, Moulton, Josselyn and Phillips.

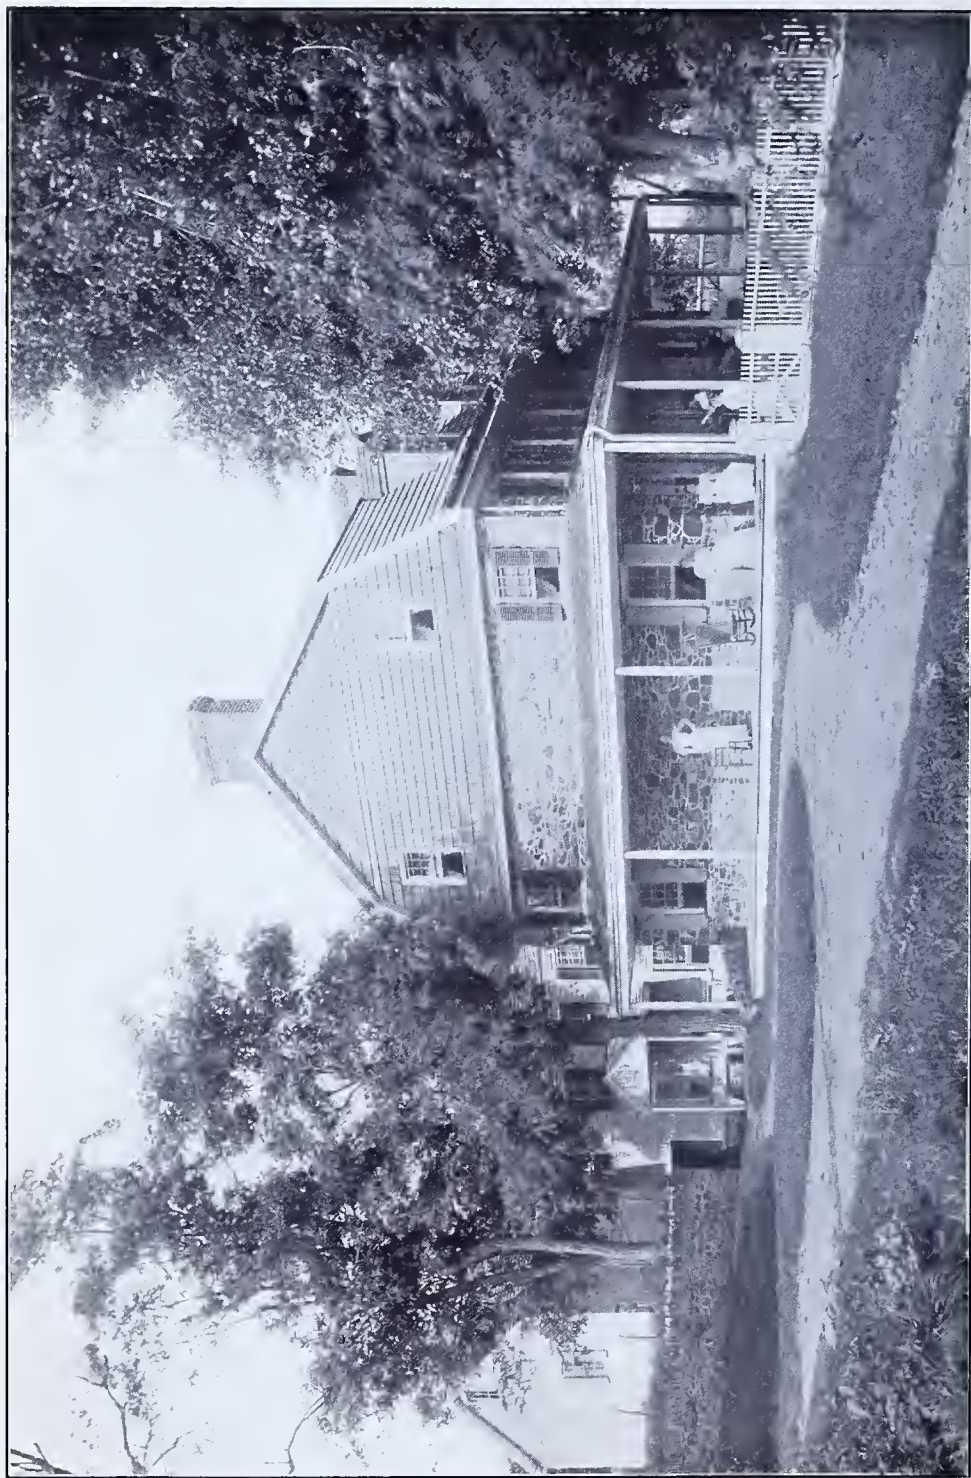

An inquiry is often made whether anything is done for the occupation or diversion of our patients. As has been stated in former reports to your Board, there is some entertainment every evening of the week, which is varied as circumstances permit. At the Women's and Men's Departments there are abundant means of occupation and diversion during the day. On Sunday there is an assemblage of patients at a reading and song service, which is always well attended.

I have to thank the physicians, Drs. Moulton, Nunemaker, Josselyn and Phillips, and the steward, William M. Walter, for their cordial co-operation in the internal administration. All can be congratulated on the existence of a harmonious hospital family.

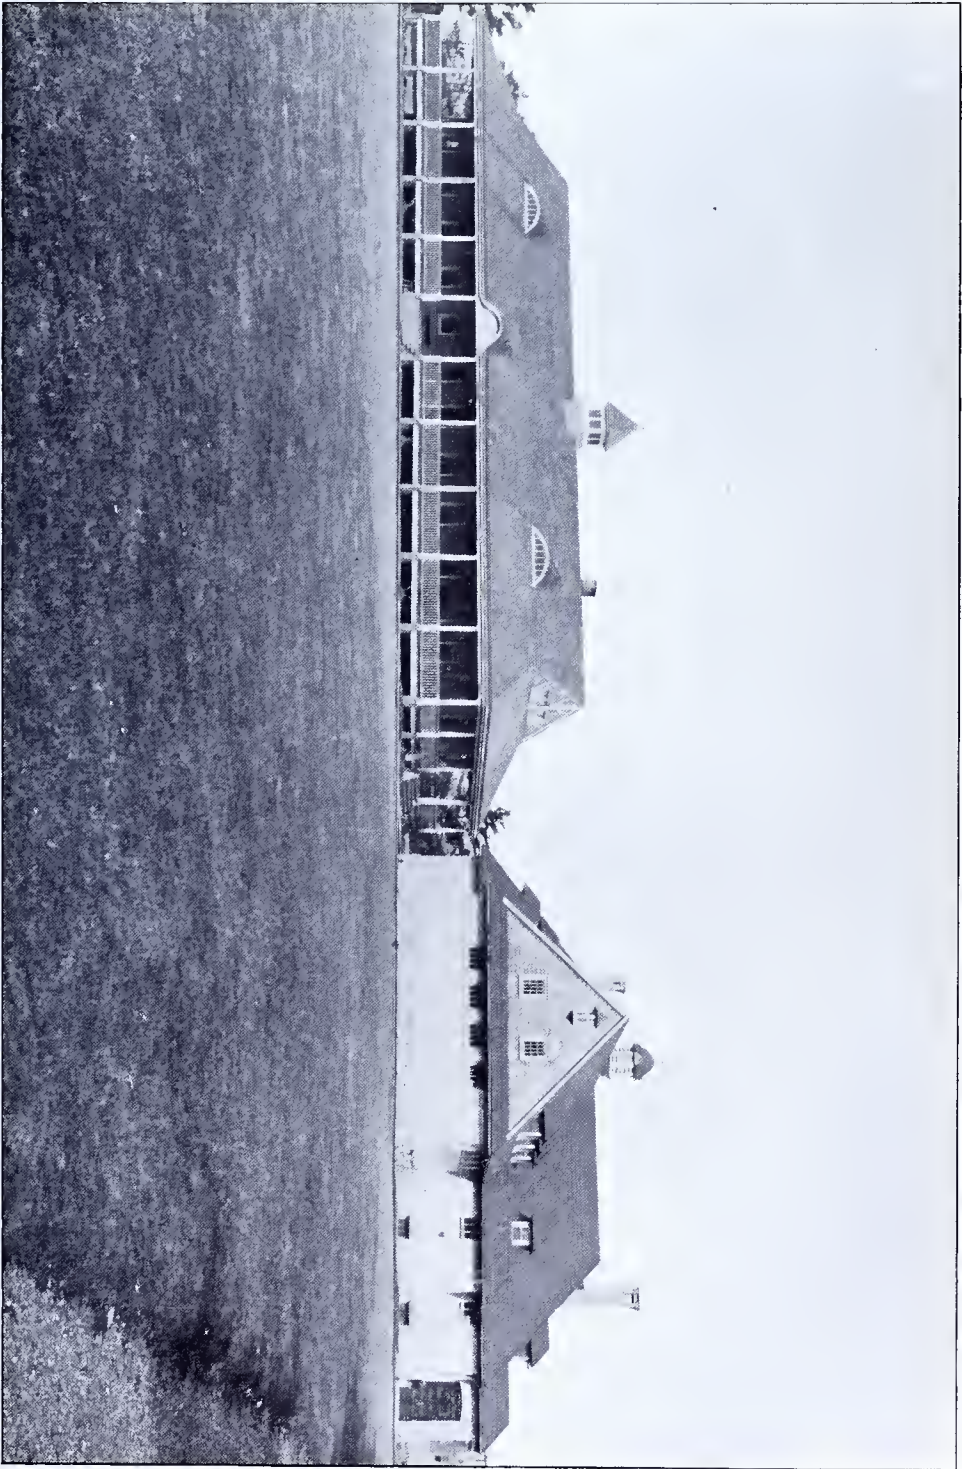

I have to thank the matrons, supervisors, and all persons concerned, for willing service rendered in all departments of the Hospital.

It has again pleased a number of friends of the Hospital to make contributions for the entertainment and diversion of our patients, which we desire to acknowledge with thanks, viz:

To Mr. T. Wistar Brown, for \$100 for the Christmas holidays; to Mr. Joseph E. Gillingham, for \$100 for the Christmas holidays; to Mr. Clarke Thompson, for \$25 for the Christmas holidays; to Mr. Walter Tomkins, for \$20 for the Christmas holidays; to a friend, for \$100; to Mrs. Lightner, for \$10 for the Christmas holidays; to Mr. Paul B. Somers, for Christmas cards; to a friend, for \$200 for the amusement fund; to Mr. T. Wistar Brown, for \$100 for the amusement fund; to Miss Anne Thomson, Mr. Clarke Thomson and Mr. Frank Thomson, for \$300 for the amusement fund; to Mr. George L. Crawford, for \$100 for the amusement fund; to Mr. Thomas L. Clarke, for \$33.50 for the amusement fund; to Mr. Charles M. Swain, for \$500 for the amusement fund; to the Franklin Fire Insurance Company, for two subscriptions to "Harper's Monthly Magazine;" to Mr. and Mrs. Charles E. School, for candy and books for Christmas; to a friend, for two sets of ping-pong; to Mr. E. Mack, for gratuitous service and purchase of musical instruments; to Captain Wilson, for magazines; to Mrs. Thomas H. Miles, for magazines; to Mr. Florence J. Heppe, for \$5; to Mr. Joseph P. Schell, for magazines; to Miss Godman, for a phonographic entertainment; to P. Blakiston's Son & Company, for a contribution to the medical library; to Mr. Samuel Drinkhouse, for a box of fish; to Mrs. Bright, for a hammock; to Mrs. E. Perot, for a box of magazines; to Mr. Whittington, for Biblical charts; to Mr. George Onimus, for two baskets of bottles and a book; to Mr. Harry J. Abbott, for eight books. From contributions to our entertainment fund we were enabled to provide during the year thirty-six concerts.

GYMNASTIC PAVILION

NATATORIUM

The weekly visits of the Attending Managers, for personal inspection of the Hospital and examination of the Steward's accounts, were continued without any abatement throughout the year. These visits form an unbroken record of service for this Department of more than sixty-two years. The personal inspection of wards bring the Managers, in rotation, in contact with the actual administration. The visits are equally helpful and encouraging to officers for purposes of conference and advice as to patients.

JOHN B. CHAPIN.

*Pennsylvania Hospital for the Insane,
Philadelphia, Pa., U. S. A., 4th Mo. 27th, 1903.*

Appendix.

STATISTICS.

Department for the Insane.

STATISTICAL TABLES.—The following statistical tables embrace patients received into the Department for the Insane since its opening in its present location on the first day of 1841.

TABLE I.—*Showing the forms of disease for which 12,132 patients were admitted.*

	Previously Re- ported.		1902-03.	
	M.	W.	M.	W.
Mania	2092	2035	6	16
“ acute	177	222	8	5
“ sub-acute	185	123	14	11
“ chronic	83	126	5	3
“ circulaire	2	1	1	1
“ recurrent	11	13	1	1
“ hysterical	43	77	1	1
“ puerperal	1	45	1	2
“ with epilepsy	10	7	1	1
“ with alcoholism	13	14	1	1

ADMISSION OF PATIENTS
INTO THE
Pennsylvania Hospital for the Insane*
AT
PHILADELPHIA.

All classes of insane persons, without regard to the duration of the disease or its curability, are admitted into this institution. Idiots, however, it may be stated, are not received; and for the epileptic a special agreement should be made.

Preparatory to the reception of a patient, it is necessary to arrange the rate of weekly charge with a member of the Board of Managers,† and to furnish a certificate of the patient's insanity from two physicians, both of whom must be residents of Pennsylvania, who shall have examined the patient within one week of its date, and the certificate shall bear date within two weeks of the admission of the patient, and the same shall be acknowledged and sworn or affirmed to before some magistrate or judicial officer [*not before a Notary Public*], as required by an Act of the Legislature of Pennsylvania, approved 1883. An "Order for the reception of a patient" must be signed by a near relative or friend. Full and complete answers should also be given to questions in "Statement."

For the payment of board, and removal of a patient when discharged, security is always required from some responsible resident of the city of Philadelphia. Payment

* *This is the only title of this institution, and the only proper direction for letters, etc.* Other names, occasionally used, are liable to make confusion, by confounding it with another institution in the same vicinity.

† The names of these gentlemen will be found in the front of this Report, and their places of residence can be learned, on application at the Hospital, on Eighth Street, between Spruce and Pine, Philadelphia, where blank forms for physicians' certificates, bonds, etc., can always be obtained.

of board is always to be made quarterly in advance; and if the patient is removed *uncured*, before the expiration of the first three months, and contrary to the advice and consent of the Superintending Physician, board is required for thirteen weeks; otherwise the charge is only for the time actually passed in the Hospital, provided the time is more than four weeks.

Interest will be charged on bills not paid till after the expiration of the quarter.

Large chambers and private attendants can always be supplied, if desired by the friends of the patients.

A patient who is not a resident of this State, and other emergency cases manifestly insane, may be brought direct to the Hospital, where they may be received and remain till the necessary medical certificates and the approval of the Managers can be procured, provided this be done within forty-eight hours.

The following are the forms for physicians' certificates, order for the reception of a patient, and the bond that is to be executed before the order of admission is given :

ORDER FOR THE RECEPTION OF A PATIENT.

I, ———, the undersigned, hereby request you to receive ———, an insane person, as a patient into the Pennsylvania Hospital for the Insane, believing that such detention is necessary for ——— benefit. Subjoined is a statement respecting the said ———.

Occupation, ———.

Degree of relationship (if any) or other circumstances of connection with the patient.

Dated this ——— day of ———, one thousand nine hundred

To the Board of Managers of the Pennsylvania Hospital for the Insane, Philadelphia, Pa.

CERTIFICATE OF PHYSICIANS.*

We, the undersigned, residents of Pennsylvania, hereby certify that we have, within one week prior to the respective dates hereinafter mentioned, at _____, in the county of _____, separately examined _____ of _____, and do verily believe that the said _____ is insane, and that the disease is of a character of which, in our opinion, requires that the person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said _____, nor in any way connected as a medical attendant or otherwise with the Pennsylvania Hospital for the Insane or other establishment in which it is proposed to place the aforesaid

CERTIFICATE OF JUDGE OR MAGISTRATE.†

I, _____, a _____ of _____ county, of the State of Pennsylvania, do certify that the foregoing certificate was duly‡ _____ to before me by the above-named _____ and _____ on this _____ of _____ 19____, that the signatures thereto are genuine, and that the signers are physicians of good standing and repute.

_____ [L.S.]

* As required by the law of Pennsylvania, approved 1883.

† Certificate of a Notary Public will not be accepted.

‡ Sworn, or affirmed.

EXTRACT FROM LUNACY LAW.

SECTION 19. *The certificate above provided for shall have been made within one week of the examination of the patient and within two weeks of the time of the admission of the patient, and shall be duly sworn to or affirmed before a judge or magistrate of this Commonwealth and of the county where such person has been examined, who shall certify to the genuineness of the signatures and to the standing and good repute of the signers. And any person falsely certifying as aforesaid, shall be guilty of a misdemeanor and also liable civilly to the party aggrieved.*

Approved—The 8th day of May, 1883.

OBLIGATION.*

In consideration of _____ being admitted as a patient into the "*Pennsylvania Hospital for the Insane*," established and maintained by "*The Contributors to the Pennsylvania Hospital*," we do jointly and severally promise to pay to the Steward of the said Hospital, or to his order, quarterly, in advance, _____ dollars _____ cents per week, for board, and to provide or pay for all requisite clothing and other things deemed necessary or proper for the health or comfort of said patient; to pay for all glass or furniture broken or destroyed by said patient; to remove _____ when discharged; and if taken away *uncured*, against the advice and consent of the Superintending Physician, before the expiration of three calendar months, to pay board for thirteen weeks or if removed, or discharged, within four weeks, with his approbation, to pay board for four weeks.† ;

Witness our hands the _____ day of _____, 190 .

_____ [L.S.]

_____ [L.S.]

The above preliminaries having been complied with, an order is given by a Manager, authorizing the Physician of the Institution to receive the patient.

Letters relative to the admission of patients into the Department for the Insane may be addressed to any of

* This obligation is to be signed by a responsible person. The surety to be a resident of the city of Philadelphia.

† If the patient recovers before the expiration of the period paid for, and leaves with the full approbation of the Physician, the excess is refunded, unless that time should be less than four weeks, for which period board is always required.
